About

I am a self taught Front End developer with great understanding of backend technologies. As a frontend developer, I can build responsive interfaces using React, JavaScript, HTML and CSS and I have great experience using these technologies. I know CSS so well that no interface will be too difficult for me to build and I can use Figma to design simple UI.

Education History

Abubakar Tafawa Balewa University Bauchi

Degree: B.Tech Quantity Survey   2013 – 2019

- Cost Engineer

Work Experience

Project I developed relating to tech.

Game of life

- Game of life is a game introduce in 1970 by mathematician John Conway following a few simple rules that determines whether or not a cell lives or die.

Self project
Scientific Calculator and To-do App

- I developed a working scientific calculator that keeps history of user activities & other features.
- To-do app that let's you perform simple crud operation.

Ongoing E-commerce Web App

- I'm developing and e-commerce web app that offers both material and services of skilled artisan for construction works. Other features are included to assist in the production of BOQ.
